

GM-65 RBT™

Walk Behind Sweeper/Scrubber

FACT SHEET

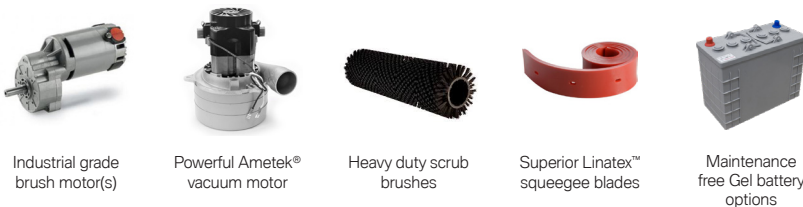

ADVANTAGES

- 2-in-1 sweeper/scrubber
- Simple controls
- Outstanding performance
- Industrial & commercial use
- Powerful first-class Ametek® vacuum motor
- Reliable “turn-key” operation
- Durable construction
- Highest grade Linatex® squeegee for optimal water suction

TYPICAL APPLICATIONS

- Manufacturing
- Warehouses
- Factories
- Distribution
- Health Clubs

GM-65 RBT™	Cylindrical	660mm (26")	33,315 sq.ft/h (up to)	\$11,900.00

GM-65 RBT™ WALK-BEHIND FLOOR SWEEPER/ SCRUBBER.

Optimized performance with dual capabilities

The GM-65 RBT™ uses a cylindrical deck that is able to ‘wet sweep’ solid debris into a removable tray while both scrubbing and vacuuming the floor. This cylindrical brush design eliminates the need to pre-sweep the floor prior to scrubbing, increasing productivity & convenience.

Cylindrical systems

Two cylindrical brushes rotate at 650 RPM while both scrubbing and (wet) sweeping the floor. Debris such as wood & paper scraps, screws & small pieces of metal, along with other small debris, is collected into a removable tray. Cylindrical systems provide excellent cleaning performance & worry-free cleaning solutions where manual pre-sweeping is required.
