G-S130™	Disc	711mm (28")	38,800 sq.ft/h (up to)	\$15,500.00
G-S160™	Disc	811mm (32")	41,780 sq.ft/h (up to)	\$18,800.00

OPTIMAL PERFORMANCE. CONSISTENT RESULTS. LOWERED CLEANING COSTS.

G-S130™/G-S160™ Compact Battery Rider Scrubbers

Get the power of a heavy-duty floor scrubber with the compact, easily maneuverable G-S130™ or G-S160™ battery powered rider scrubbers. Engineered for easy operation and maintenance, these units combine innovative features and substantial power for an effective clean, every time! Experience heavy duty power combined with a wide scrub path, without sacrificing maneuverability.

Cylindrical options

The G-S130™ or G-S160™ is also available with two cylindrical brushes. Cylindrical brushes have a high rotation speed & are capable of both scrubbing and (wet) sweeping the floor in a single pass. Debris such as wood & paper scraps, screws & small pieces of metal, along with other small debris, is collected into a removable tray. Cylindrical systems provide excellent cleaning performance & worry-free cleaning solutions in the appropriate application.
