Innovative Design
with large water tank.

Mendel XD70R | Automatic Floor Scrubber

Set new standards of cleaning with the Mendel XD70R floor scrubber. This versatile Mid-Size Walk-Behind Scrubber is enhanced with cylindrical scrub brushes. Cylindrical floor scrubbers use a scrub brush system that will (wet) sweep small debris into a removable tray, while also scrubbing & drying your floors simultaneously. Because Cylindrical floor scrubber brushes spin at an exceptionally high rate (800-1200 RPM), they are able to tackle daily soil and reduce the need for excessive chemicals unlike that of ordinary floor scrubbers. The Mendel XD70R is guaranteed to provide clean, dry floors in minutes...enhancing your company image, health and safety.

Features

- Commercial & industrial reliability.
- Uses 70% less detergent than traditional scrubbers.
- Simple, intuitive controls.
- 711mm Cylindrical Scrub Deck.
- Large 22.5 gallon water tank.
